PROBLEM TITLE:

E-PHARMACY APPLICATION DOORSTEP DELIVERY

A.INDHU(6658)
P.AMRUTHA(6632)
S.SNEHITHA(6624)
N.AKSHITHA(6615)

PROBLEM STATEMENT:

Theme: Healthcare & Digital Pharmacy

Traditional pharmacies require in-person visits, causing inconvenience, especially for elderly and disabled individuals.

Manual prescription handling leads to errors and delays.

Patients struggle with tracking recurring medications and refilling prescriptions on time.

Lack of real-time order tracking causes uncertainty in medicine delivery.

Inefficient inventory management in physical stores results in medicine unavailability.

ABSTRACT:

- The E-Pharmacy Application is an online platform designed to simplify medicine purchases. It allows users to:
  Browse and order medicines.
  Upload e-prescriptions for verification.
  Set up automated refills for recurring medications.
  Track orders in real-time for a better user experience.
  Additionally, an Admin Dashboard is provided for efficient:
  Medicine inventory management.
  Stock updates.
  Prescription verification.
